ARCHITECTURE AWARDS
2024

As the world's population continues to rise and people are enjoying higher levels of disposable income, the residential segment of the architectural industry in particular is going from strength to strength. Architects have to keep pace with the changing needs of today's consumers in order to stay competitive and set themselves apart from other providers. Customer habits and preferences have shifted in recent years to incorporate home offices, open spaces, and eco-friendly design.

ABOUT THE AWARD

The BUILD Awards are devoted to identifying and honoring the very best in technical innovation, design, and services from all around the world in the construction and property sectors.

All sectors and areas are covered by the awards, which are presented throughout the year. Everyone is recognised at all levels, from architects and suppliers to top-level CEOs, and thanks to our hard working team of researchers, we are able to honor those who have excelled in their fields the most.
